

TOMBO® No.9947-T

## NAFLON™ PFA Roto Molded Tank **K**

CONTAINERS

NAFLON PFA Roto Molded Tank is a tank for the supply, storage, and transportation of chemicals, with a single-piece PFA container on the external SUS can.

The parts in contact with the liquid are made from one-piece PFA-HG to provide a smooth surface. In addition, the lack of welded parts enables efficient washing.

### Applications

- Tank for chemical dispense, storage and transfer

### Specifications

- Standard capacities: 100 liters, 200 liters, 400 liters, 500 liters, 800 liters, 1000 liters
- Maximum service temperature: 50°C
